

Design and Technology

Children at Prettygate love Design and Technology! Often linked to learning in other curriculum areas, our children get creative as they design and make products fit for an intended purpose. We are often amazed by the children's fantastic finished products, ranging from free-standing rockets to working burglar alarms, and motorised vehicles to delicious Mexican food. Our engaging and motivating projects encourage our children to take calculated risks, innovate, collaborate and show initiative. Through our Design and Technology programme, our pupils develop the foundational knowledge and skills important for the next step of their education and beyond.
